The diagram illustrates three linear equations using fruit icons as vectors. Each fruit is assigned a value: Apple (\$1), Banana (\$2), and Cherry (\$1). These values are represented by blue boxes with the number 1.

The first equation, $a + b + c = 10$, is shown as the sum of three fruit vectors (Apple, Banana, Cherry) multiplied by a price vector ($\$1, \$2, \$1$) resulting in a total price of \$10.

The second equation, $a + 2b + c = 15$, is shown as the sum of two Banana vectors (Banana, Banana) and one fruit vector (Apple, Banana, Cherry) multiplied by a price vector ($\$1, \$2, \$1$) resulting in a total price of \$15.

The third equation, $a + b + 2c = 12$, is shown as the sum of one Apple vector (Apple) and one Banana vector (Banana) multiplied by a price vector ($\$1, \$2, \$1$) resulting in a total price of \$12.

Equations as dot product

Quiz

- Find the inverse of the following matrix. If you find that the task is impossible, feel free to click on “I couldn’t find it”

5	2
1	2

Solution

- By solving the corresponding system of linear equations, we get the following.

$$\begin{array}{|c|c|} \hline 5 & 2 \\ \hline 1 & 2 \\ \hline \end{array} \cdot \begin{array}{|c|c|} \hline a & b \\ \hline c & d \\ \hline \end{array} = \begin{array}{|c|c|} \hline 1 & 0 \\ \hline 0 & 1 \\ \hline \end{array}$$

$$\begin{array}{|c|c|} \hline 5 & 2 \\ \hline \end{array} \begin{array}{|c|} \hline a \\ \hline c \\ \hline \end{array} = \begin{array}{|c|} \hline 1 \\ \hline \end{array}$$

$$\begin{array}{|c|c|} \hline 5 & 2 \\ \hline \end{array} \begin{array}{|c|} \hline b \\ \hline d \\ \hline \end{array} = \begin{array}{|c|} \hline 0 \\ \hline \end{array}$$

Solution

- By solving the corresponding system of linear equations, we get the following.

$$\begin{array}{|c|c|} \hline 5 & 2 \\ \hline 1 & 2 \\ \hline \end{array} \cdot \begin{array}{|c|c|} \hline a & b \\ \hline c & d \\ \hline \end{array} = \begin{array}{|c|c|} \hline 1 & 0 \\ \hline 0 & 1 \\ \hline \end{array}$$

Quiz

- Find the inverse of the following matrix. If you find that the task is impossible, feel free to click on “I’m reaching a dead end”

1	1
2	2

Solutions

- The inverse doesn't exist!

We need to solve the following system of linear equations:

$$\begin{array}{|c|c|} \hline 1 & 1 \\ \hline 2 & 2 \\ \hline \end{array} \quad \begin{array}{|c|c|} \hline a & b \\ \hline c & d \\ \hline \end{array} \quad = \quad \begin{array}{|c|c|} \hline 1 & 0 \\ \hline 0 & 1 \\ \hline \end{array}$$

$$a + c = 1$$

$$2b + 2d = 1$$

$$2a + 2c = 0$$

$$b + d = 0$$

This is clearly a contradiction, since equation 1 says $a+c=1$, and equation 3 says $2a+2c=0$.

The diagram illustrates matrix multiplication. On the left, a 9x3 matrix is multiplied by a 3x9 matrix. The result is a 9x9 matrix where each row contains the sum of the products of the corresponding row from the first matrix and the column from the second matrix. The columns of the second matrix are labeled "Model". The resulting matrix has rows labeled "Prod".
